

# **Project 1: House Price Prediction**

The goal for this project is to build a solution that is capable of predicting the house prices better than individuals.

The following properties can be considered helpful for predicting price of house:

1. Total square feet area
2. Number of bedrooms, bathrooms, stories etc
3. Furnishing status
4. Basic amenities like :
  - a. Air conditioning
  - b. Hot water heating
  - c. Parking
  - d. Basement
